

INTELLIGENT CONTAINER SOLUTIONS (ICS)

How It Works & How To

Streamline empty container returns from pre-forecast to gate pass.

Container Return Management Platform • End-to-End Workflow

What is ICS?

Slide 2

ICS connects truckers, shipping-line evaluators, and depot teams on one unified workflow.

Without ICS

- Spreadsheets & phone calls
- Paper ATW & unclear status
- Manual handoffs
- Fragmented payment & QR

With ICS

- One shared portal
- Digitized, auditable statuses
- Real-time notifications
- Payments + LOGICTECK QR in one place

ICS does not replace each company's internal ops system — it is the shared communication, validation, and audit layer.

Who Uses ICS?

Slide 3

Role	Who	Main Job in ICS
Trucker	Trucking companies / drivers	Pre-forecast, payments, QR, withdrawals
Evaluator	Shipping line	Approve / reject pre-forecast, assign CY
Depot	Container Yard (CY) personnel	Schedule slots, verify payment, release
Administrator	Organization admin	Users, settings, oversight
Broker (optional)	Brokers	Submit pre-advice on behalf of truckers

Truckers can self-register. Evaluator, depot, and admin accounts are provisioned by the organization.

How ICS Works (Big Picture)

Slide 4

- | | |
|-------------------|---------------------------------------|
| 01 Pre-forecast | Trucker submits container + photos |
| 02 Evaluate | Shipping line reviews & assigns CY |
| 03 Schedule & pay | Depot assigns slot · Trucker pays |
| 04 Return & QR | Booking QR · LOGICTECK · gate release |

One auditable path from trucker submission to depot release — whether the container returns to a CY or Port Terminal.

End-to-End Journey (Returns)

Slide 5

1. **Trucker / Broker** submits Pre-forecast
2. **Evaluator** approves + assigns CY
3. **Depot** assigns date / time / slot + trucker
4. **Trucker** uploads payment proof
5. **Depot** verifies payment
6. **ICS** publishes booking QR (LOGICTECK)
7. **Yard / LOGICTECK** container return at gate

How to: Trucker Account Setup

Slide 6

- Open the ICS web portal (or ICS Trucker mobile app).
- Tap **Create trucker account / Sign up**.
- Enter username, email, full name, and password (min. 8 characters).
- Sign in and complete profile if needed.

Tip

Use the mobile app for notifications, returns, payments, and QR on the road.

How to: Submit a Pre-forecast (Trucker)

Slide 7

Goal: Request to return an empty container.

Steps:

- Go to **Pre-forecast** → **New**.
- Enter container number, shipping line, size & type, remarks.
- Upload required identity / container photos.
- Review next steps and submit.

Status Meanings:

Status	Meaning
Draft	Saved, not submitted
Submitted	Waiting for evaluator
Approved	CY assigned — await depot
Rejected	Fix and resubmit

How to: Evaluate a Pre-forecast (Evaluator)

Slide 8

Goal: Approve compliance and assign the return yard.

- Sign in as Shipping Line Evaluator and open **Evaluations**.
- Open the pre-forecast dossier (container, photos, history).
- Choose action:
 - **Approve** → select CY / Port Terminal
 - **Reject** / request corrections with remarks
- Save. The trucker is notified, and approved requests move to the depot.

How to: Schedule a Return (Depot)

Slide 9

Goal: Give the trucker a date, time, and slot.

- Sign in as Depot Personnel.
- Open **Schedules** and find the approved pre-forecast.
- Assign Date, Time / slot, and Trucker (if not already set).
- Confirm. The trucker sees the schedule under **My Returns**.

How to: Pay & Confirm (Trucker → Depot)

Slide 10

Trucker Action

- Open **Payments** (or return → Upload payment).
- Check fee amount & upload payment proof (image/ PDF).
- Enter reference no. & transaction details.
- Submit — status becomes *For verification*.

Depot Action

- Open **Payments (pending)**.
- Review payment proof.
- Approve or Reject (with remarks).
- After approval, proceed to QR.

How to: Get the Booking QR (Trucker)

Slide 11

- After payment is verified, open **QR Passes / QR Codes**.
- Open the booking for your schedule.
- View / Download / Print the booking QR.
- Present the QR at the gate (LOGICTECK validation).

The QR carries pre-forecast / booking details for LOGICTECK integration.

Withdrawals (ATW) — How It Works

Slide 12

Separate flow for container repositioning (Authority to Withdraw).

Shipping Line issues ATW ↓ Trucker submits request (+ ATW certificate) ↓ CY / Depot validates ↓ Approve / Reject

ICS checks before approval: valid ATW, not expired, container in yard, no duplicate, authorized trucker matches.

How to: Withdrawal Request (Trucker)

Slide 13

- Open **Withdrawals** → **New**.
- Enter ATW number, shipping line, depot, destination, dates, purpose.
- Add container lines (number, size, type) and attach ATW certificate.
- Submit for review. After approval, check pickup schedule.

On the list screen, ICS shows a quick summary of up to 5 containers (+N more if applicable).

Demurrage & Other Actions

Slide 14

Module	Who	What to Do
Demurrage billing	Trucker	View charges → upload payment proof if required
Notifications	All	Open alerts → tap to go to related detail page
News & updates	Trucker	Read depot / ICS announcements
Reports	Trucker / ops	Daily / monthly returns reports
Profile	All	Update email, name, password

Channels: Web vs Mobile

Slide 15

Action	Web Portal	ICS Trucker App
Pre-forecast	✓	✓
Returns / schedules	✓	✓
Payments	✓	✓
QR passes	✓	✓
Withdrawals	✓	✓
Demurrage	✓	✓
Push notifications	—	✓
Evaluation / Depot ops	✓	— (role portals)

Status Cheat Sheet (Returns)

Slide 16

Pre-forecast: Draft → Submitted → Approved (CY assigned) [or Rejected]
Schedule: Assigned → Confirmed
Payment: Pending → For verification → Paid [or Rejected/Re-upload]
Release: QR published → Gate / LOGICTECK → Completed

Demo Walkthrough (Happy Path)

Slide 17

Step	Role	Account (Demo)	Action
1	Trucker / Broker	trucker1 / broker1	Create & submit pre-forecast
2	Evaluator	evaluator1	Approve + assign CY
3	Depot	depot1	Assign date, slot, trucker
4	Trucker	trucker1	Upload payment proof
5	Depot	depot1	Verify payment
6	Trucker	trucker1	Download booking QR

Default demo password pattern: Role@123 (e.g. Trucker@123).

Key Takeaways

Slide 18

- One platform for the full empty-return chain.
- Clear handoffs: Trucker → Evaluator → Depot → Trucker → Depot → QR / gate.
- **How to remember:** Submit → Approve → Schedule → Pay → Verify → QR.
- ATW withdrawals follow a parallel, digitized release path.
- Web + mobile keep truckers moving; ops roles stay on the portal.

Thank You / Q&A

Slide 19

Questions?

Intelligent Container Solutions (ICS)

Pre-forecast empty containers for return to CY or Port Terminal

Appendix A & B: Quick Checklists

Appendix

Trucker Checklist

- Sign up / sign in
- New pre-forecast + photos → Submit
- Wait for approval & schedule notification
- Open Returns → confirm slot
- Payments → upload proof
- Wait for payment approval
- QR Passes → download / show at gate
- (If needed) Withdrawals / Demurrage

Ops Checklist

Evaluator:

- Open Evaluations
- Review dossier & photos
- Approve + assign CY or reject with remarks

Depot:

- Assign schedule (date / time / slot / trucker)
- Verify payment proof
- Support release / gate coordination
